[0038] In operation of this preferred embodiment, the light source 108 would be turned on, for example, before sunset on Friday night. First, bases 104, 120 would be brought together to make the surfaces 122, 124 flush and to cause the light source 108 to fit through the aperture 128 and fully within the enclosure formed by the outer and inner cylinders 130, 132. It should be understood that, in accordance with religious observance requirements, the element 108 should not touch the wall of the inner cylinder 132 during the use of Shabbos. Thereafter, the plug 116 would be placed into an electrical outlet to provide electricity to the light source 108 and the switch 117 would be turned "on" to the cause the light source 108 to generate light.
